ENCLOSURES (NO. & TYPE)

REMARKS

25X1

25X1

1. The Neustadt-Glewe (M 54/T 53) airfield was unoccupied and not serviceable on 4 August 1950. \* It could be reconditioned in a very short time.
2. The landing field had a firm grass cover and was overgrown with shrubs in some places. There were old fire trenches and foxholes and cattle grazed on the field. A herdsman said that he had not seen any Russians at the field but that Volkspolizei (vP) had practiced there some time before. He also said that he had not observed any indications of an intended reconditioning of the field. No mention was made in the town that the former field was to be reconditioned. \*
3. The debris of two small hangars were in the northern section of the field. No installations were seen except an intact concrete strip, about 7x100 meters which was southeast of the debris. \*
4. Two firing ranges in fair condition were in the woods north of the field.

25X1

\* [redacted] Comment. The status of the airfield has not changed compared with observations of May 1950 [redacted] No reports have been received that it is planned to recondition the field.
